LEVEL 0 DFD

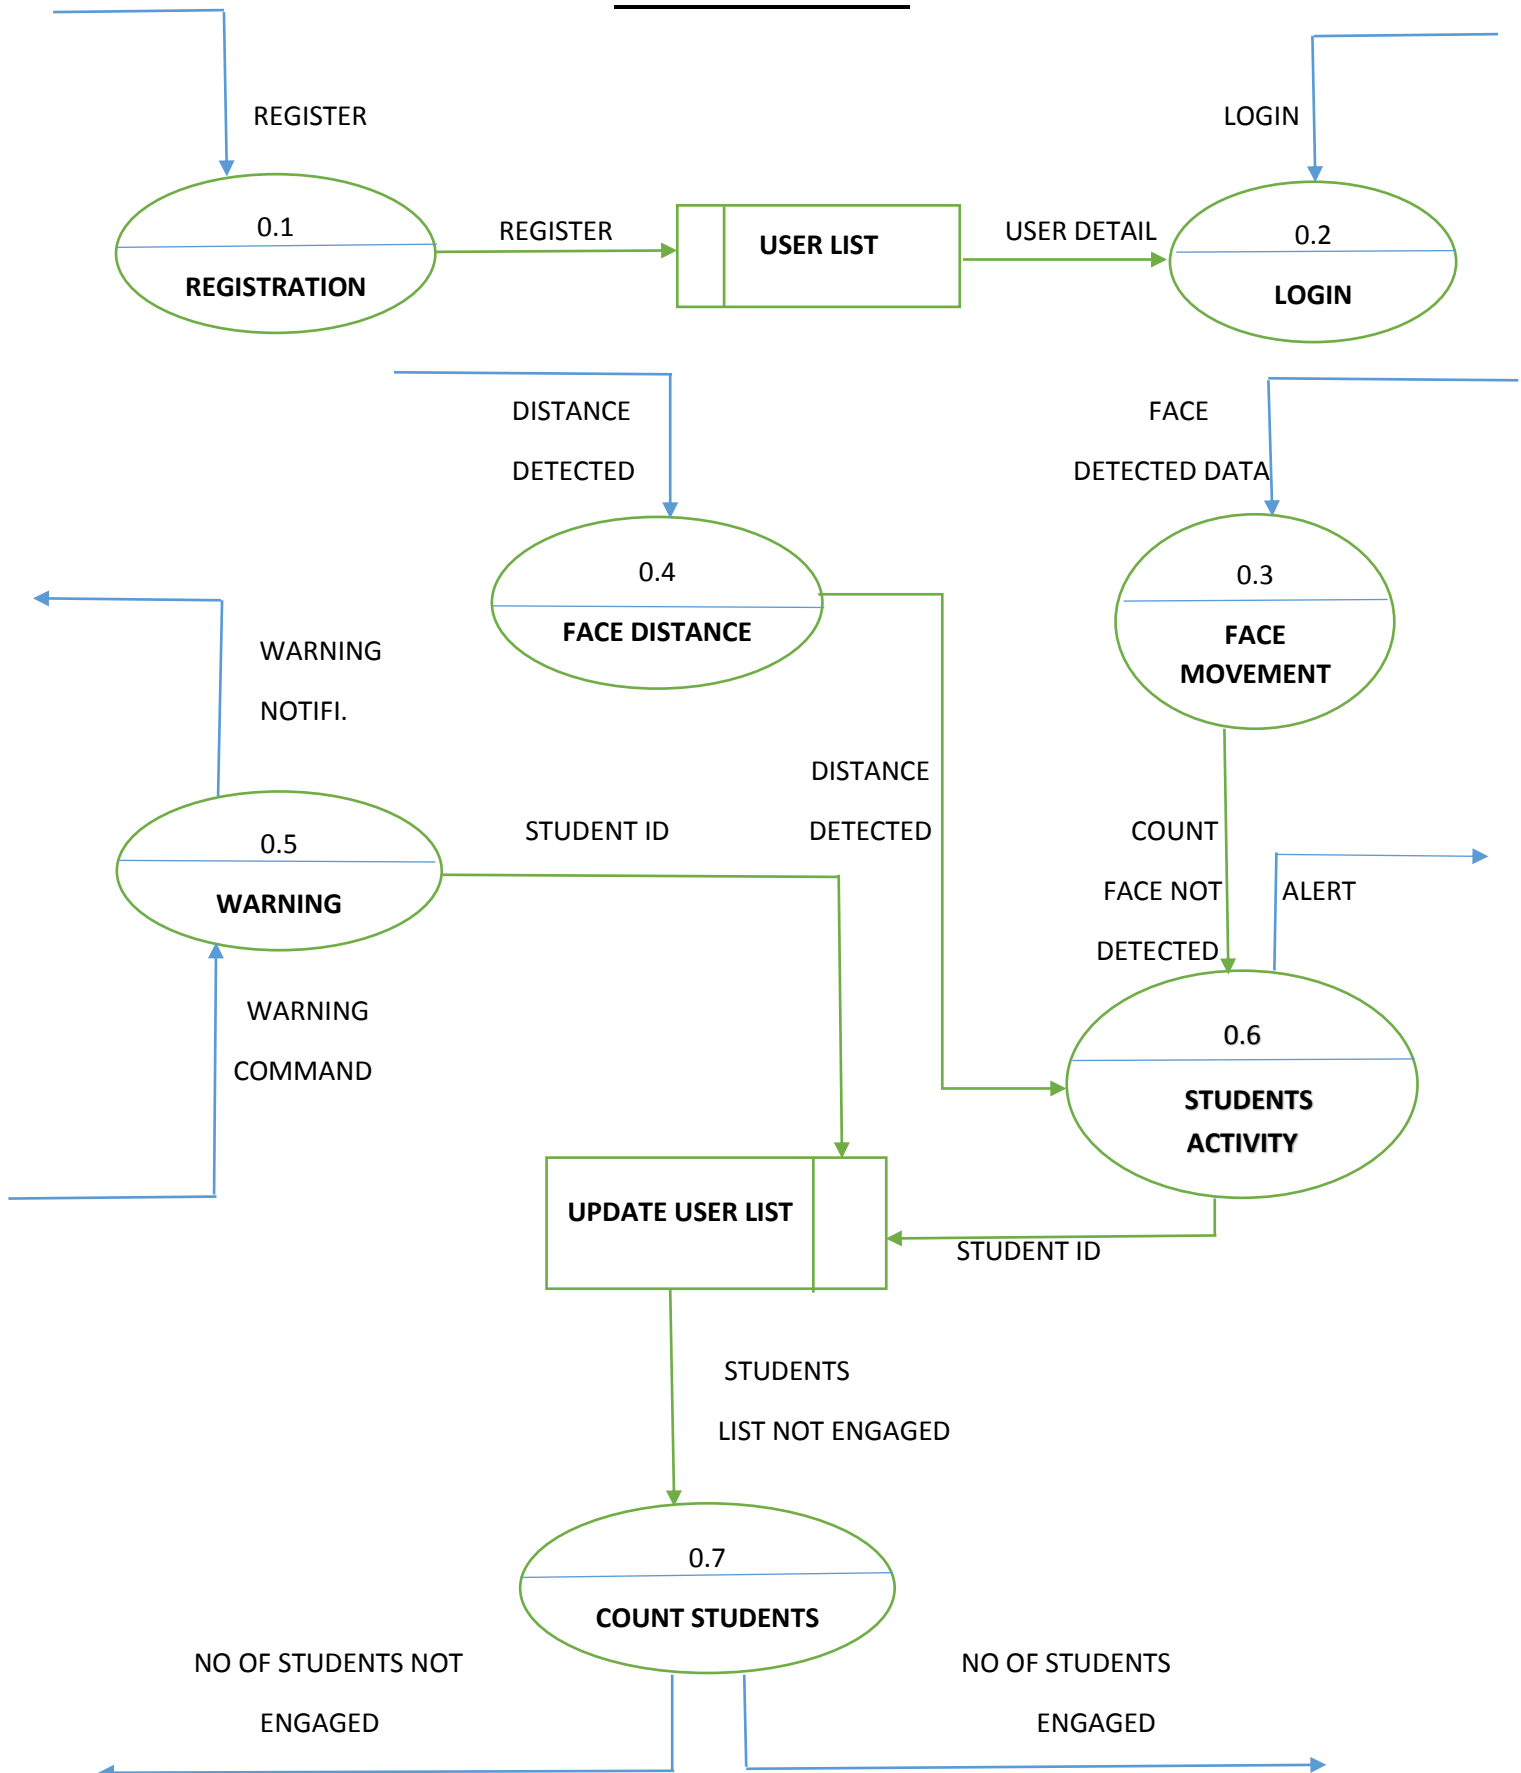

CONTEXTUAL LEVEL DIAGRAM

BLUE ARROW (→) : For data flow to other level of DFD

GREEN ARROW (→) : For data flow within the same level of DFD

NOTE : Use the DATA DICTIONARY whenever have any confusion about flow of any data

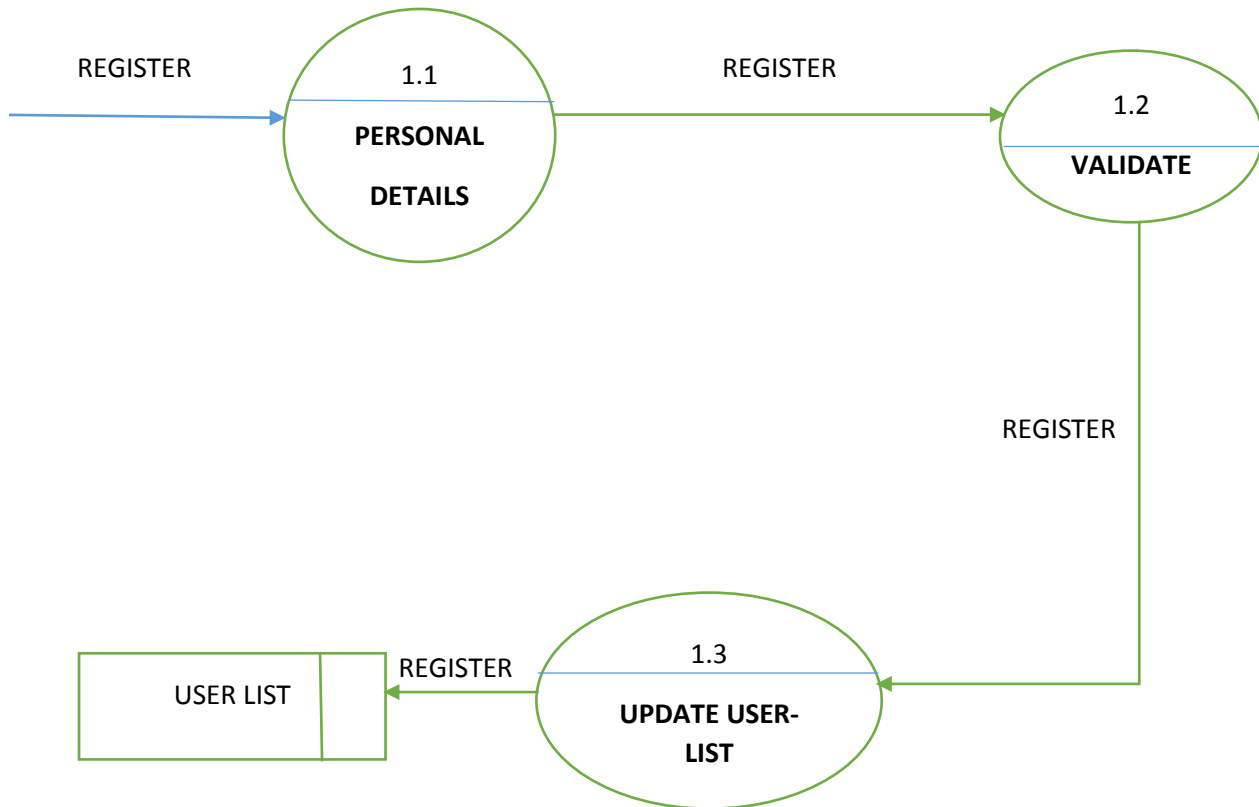

LEVEL 1 DFD

DATA DICTIONARY : TILL LEVEL 0 AND LEVEL 1

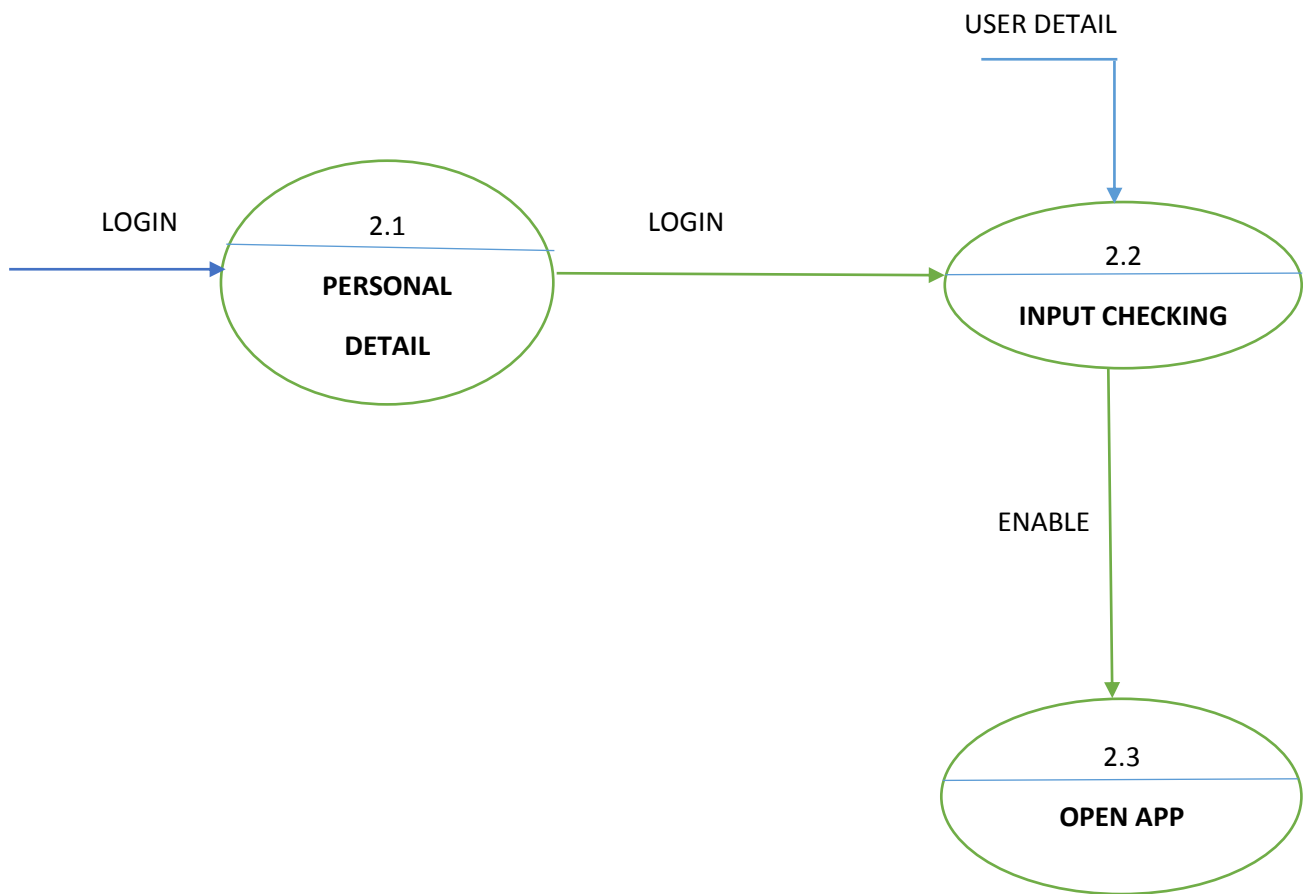

- **REGISTER** : [username + password] Input user registration data.
- **LOGIN** : [username + password] Input login details of existing user.
- **DISTANCE - DETECTED** : [integer] Distance detected by Proximity Sensor.
- **FACE – DETECTED DATA** : [integer 2d-matrix] Face detected data from a Camera.
- **WARNING_– COMMAND** : [string] Command to send warning notification to all non- engaged students.
- **ALERT** : [string] Alert notification (of not engaged student) to teacher and list of non- engaged students updates every 2 -minute.
- **NO. OF STUDENTS ENGAGED** : [integer] Number of engaged students.
- **NO._OF STUDENTS NOT-ENGAGED** : [integer] Number of students not engaged.
- **COUNT FACE NOT DETECTED** : [integer] Number of times face not detected in a time period of 2 Minute.
- **WARNING NOTIFICATION** : [string] Warning data to particular students (with students id).
- **USER_LIST** : [string ,integer] Details(username , password , student id) of all users on system (students + teacher).
- **STUDENTS ID** : [integer] Specific id for every student in class.
- **USER_DETAIL** : [stduents id (integer),username(string)] User data stored in user list.
- **STUDENT LIST NOT ENGAGED** : [int array] List containing student id's of students not engaged.
- **UPDATE USER LIST** : [student id + not engaged] Contains all student id's + not engaged(attribute containing their engagement details).

LEVEL 2 DFDs

1) REGISTRATION

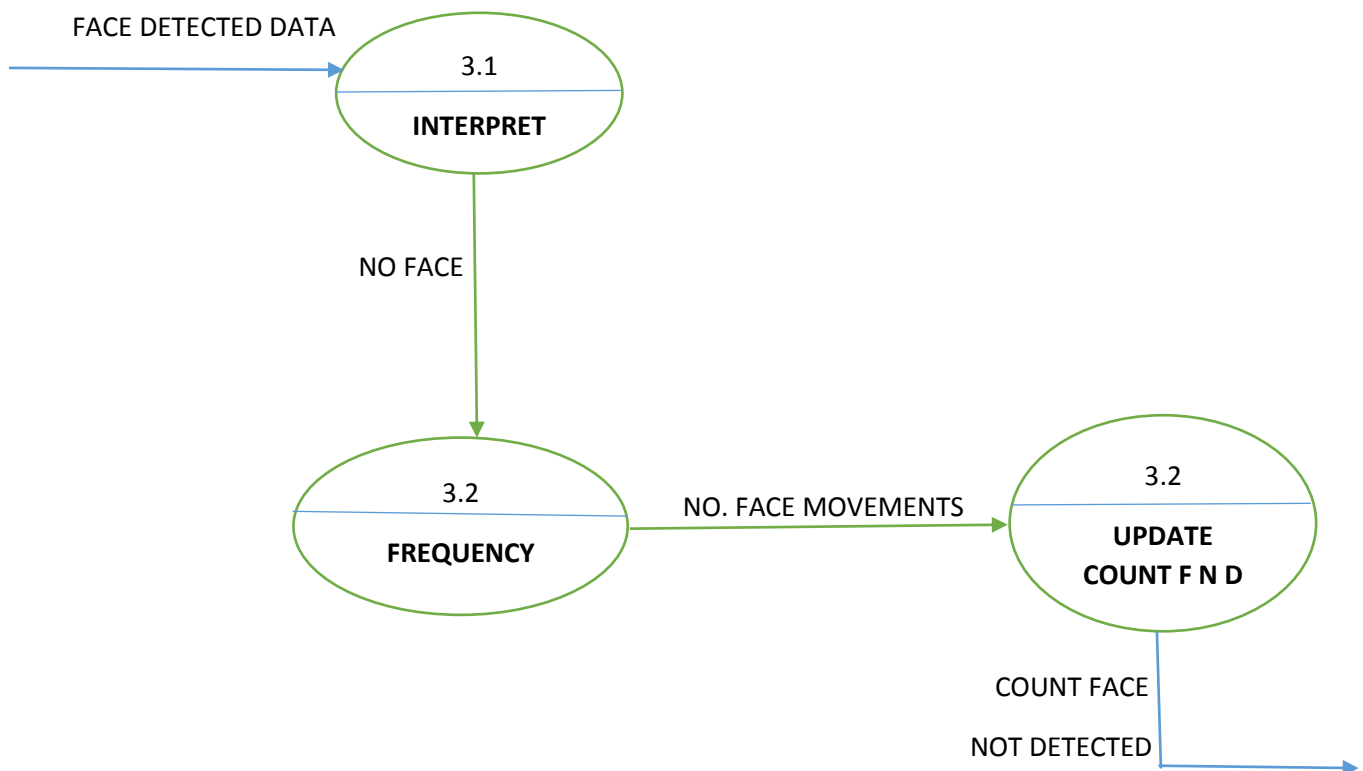

2) LOGIN

ADDITION TO DATA DICTIONARY

- **ENABLE** : [string] Data which enables login into app.

3) FACE MOVEMENT

- **FUNC 3.1 INTERPRET** : This function interprets detected data and sends NO FACE signal.
- **FUNC 3.2 FREQUENCY** : Function to keep track of frequency of “no face detection” every 2 minute duration

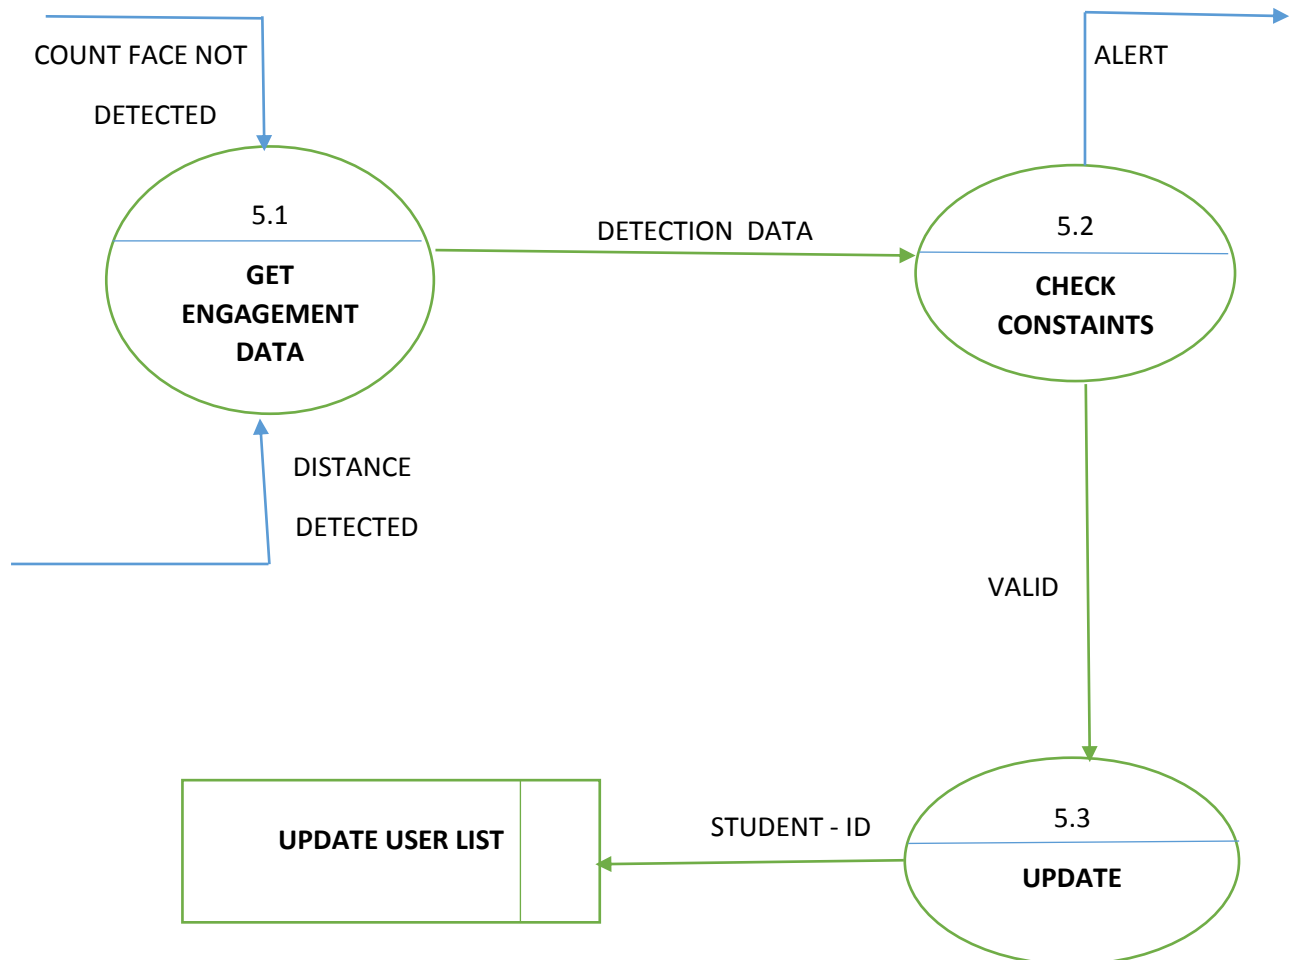

ADDITION TO DATA DICTIONARY

- **NO FACE** : [boolean] Boolean data , in which TRUE means face not detected.
- **NO. FACE MOVEMENT** : [integer] Data for no of times face not detected in a duration of 2mins.

4) FACE DISTANCE

This function just returns distance [integer] of face from mobile screen using proximity sensor. No sub functions.

5) STUDENT ACTIVITY

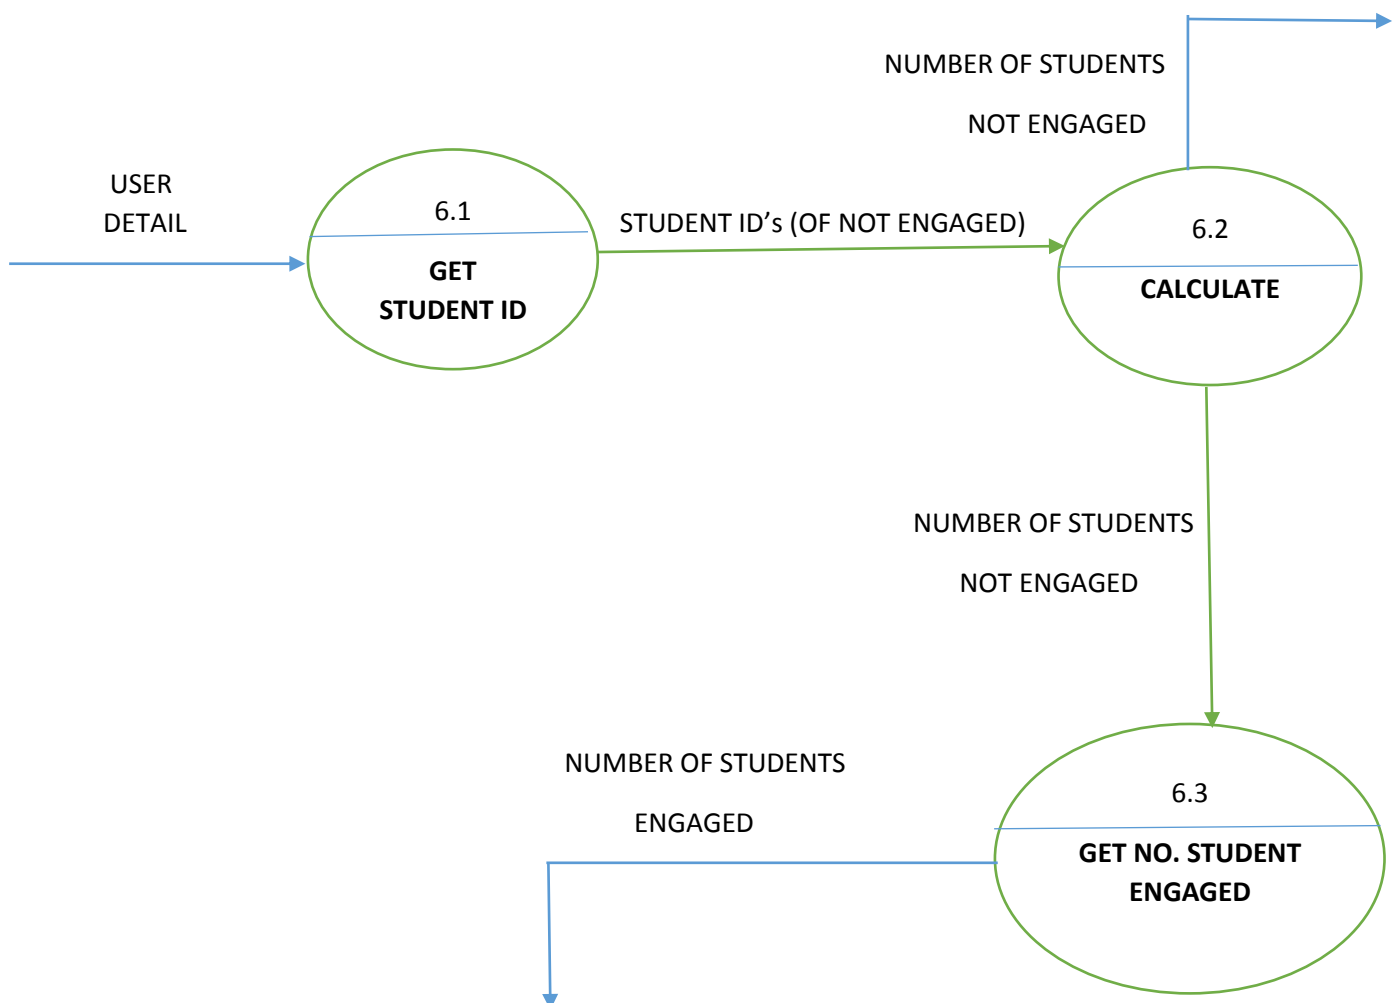

- **FUNC 5.2 CHECK CONSTRAINTS** : This function checks constraints over face distance and no. of face movements of student.
- **FUNC 5.3 UPDATE** : This function updates the attribute “not-engaged” of Students in user-list database.

ADDITION TO DATA DICTIONARY

- **DETECTED DATA** : [count face not detected + distance] The detected data of face distance and face movements(in last 2 min duration).
- **VALID** : [boolean] Boolean data , TRUE is student not engaged.

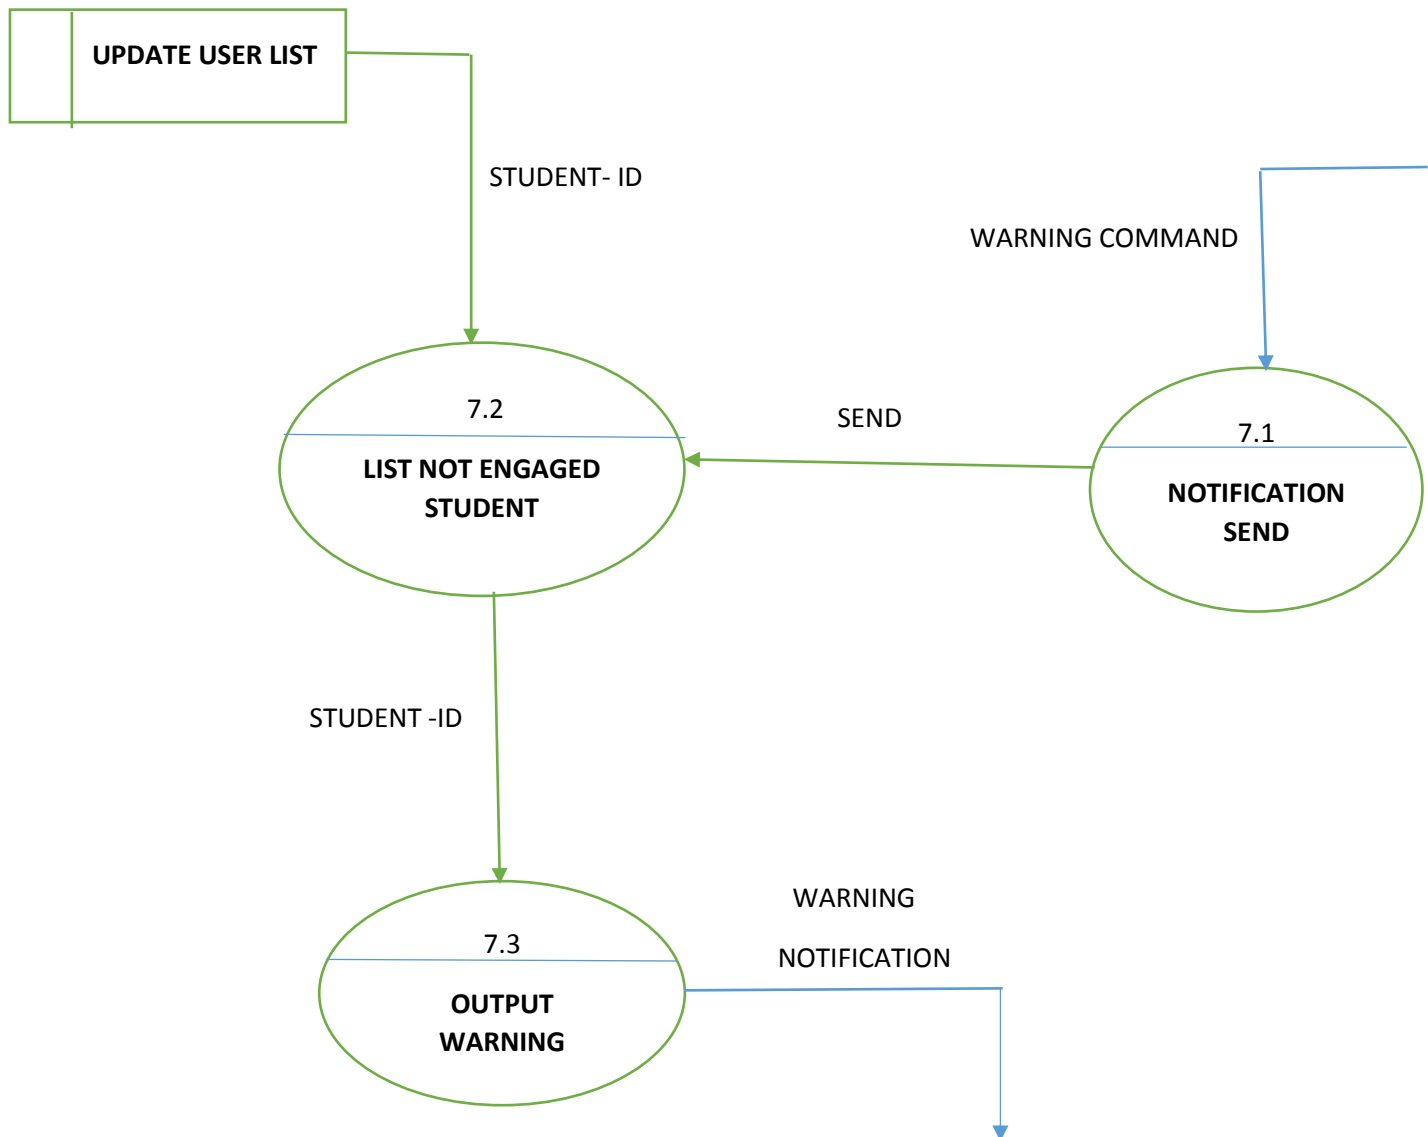

6) COUNT STUDENTS

ADDITION TO DATA DICTIONARY

- **NUMBER OF STUDENTS NOT ENGAGED** : [integer]
- **NUMBER OF STUDENTS ENGAGED** : [integer]

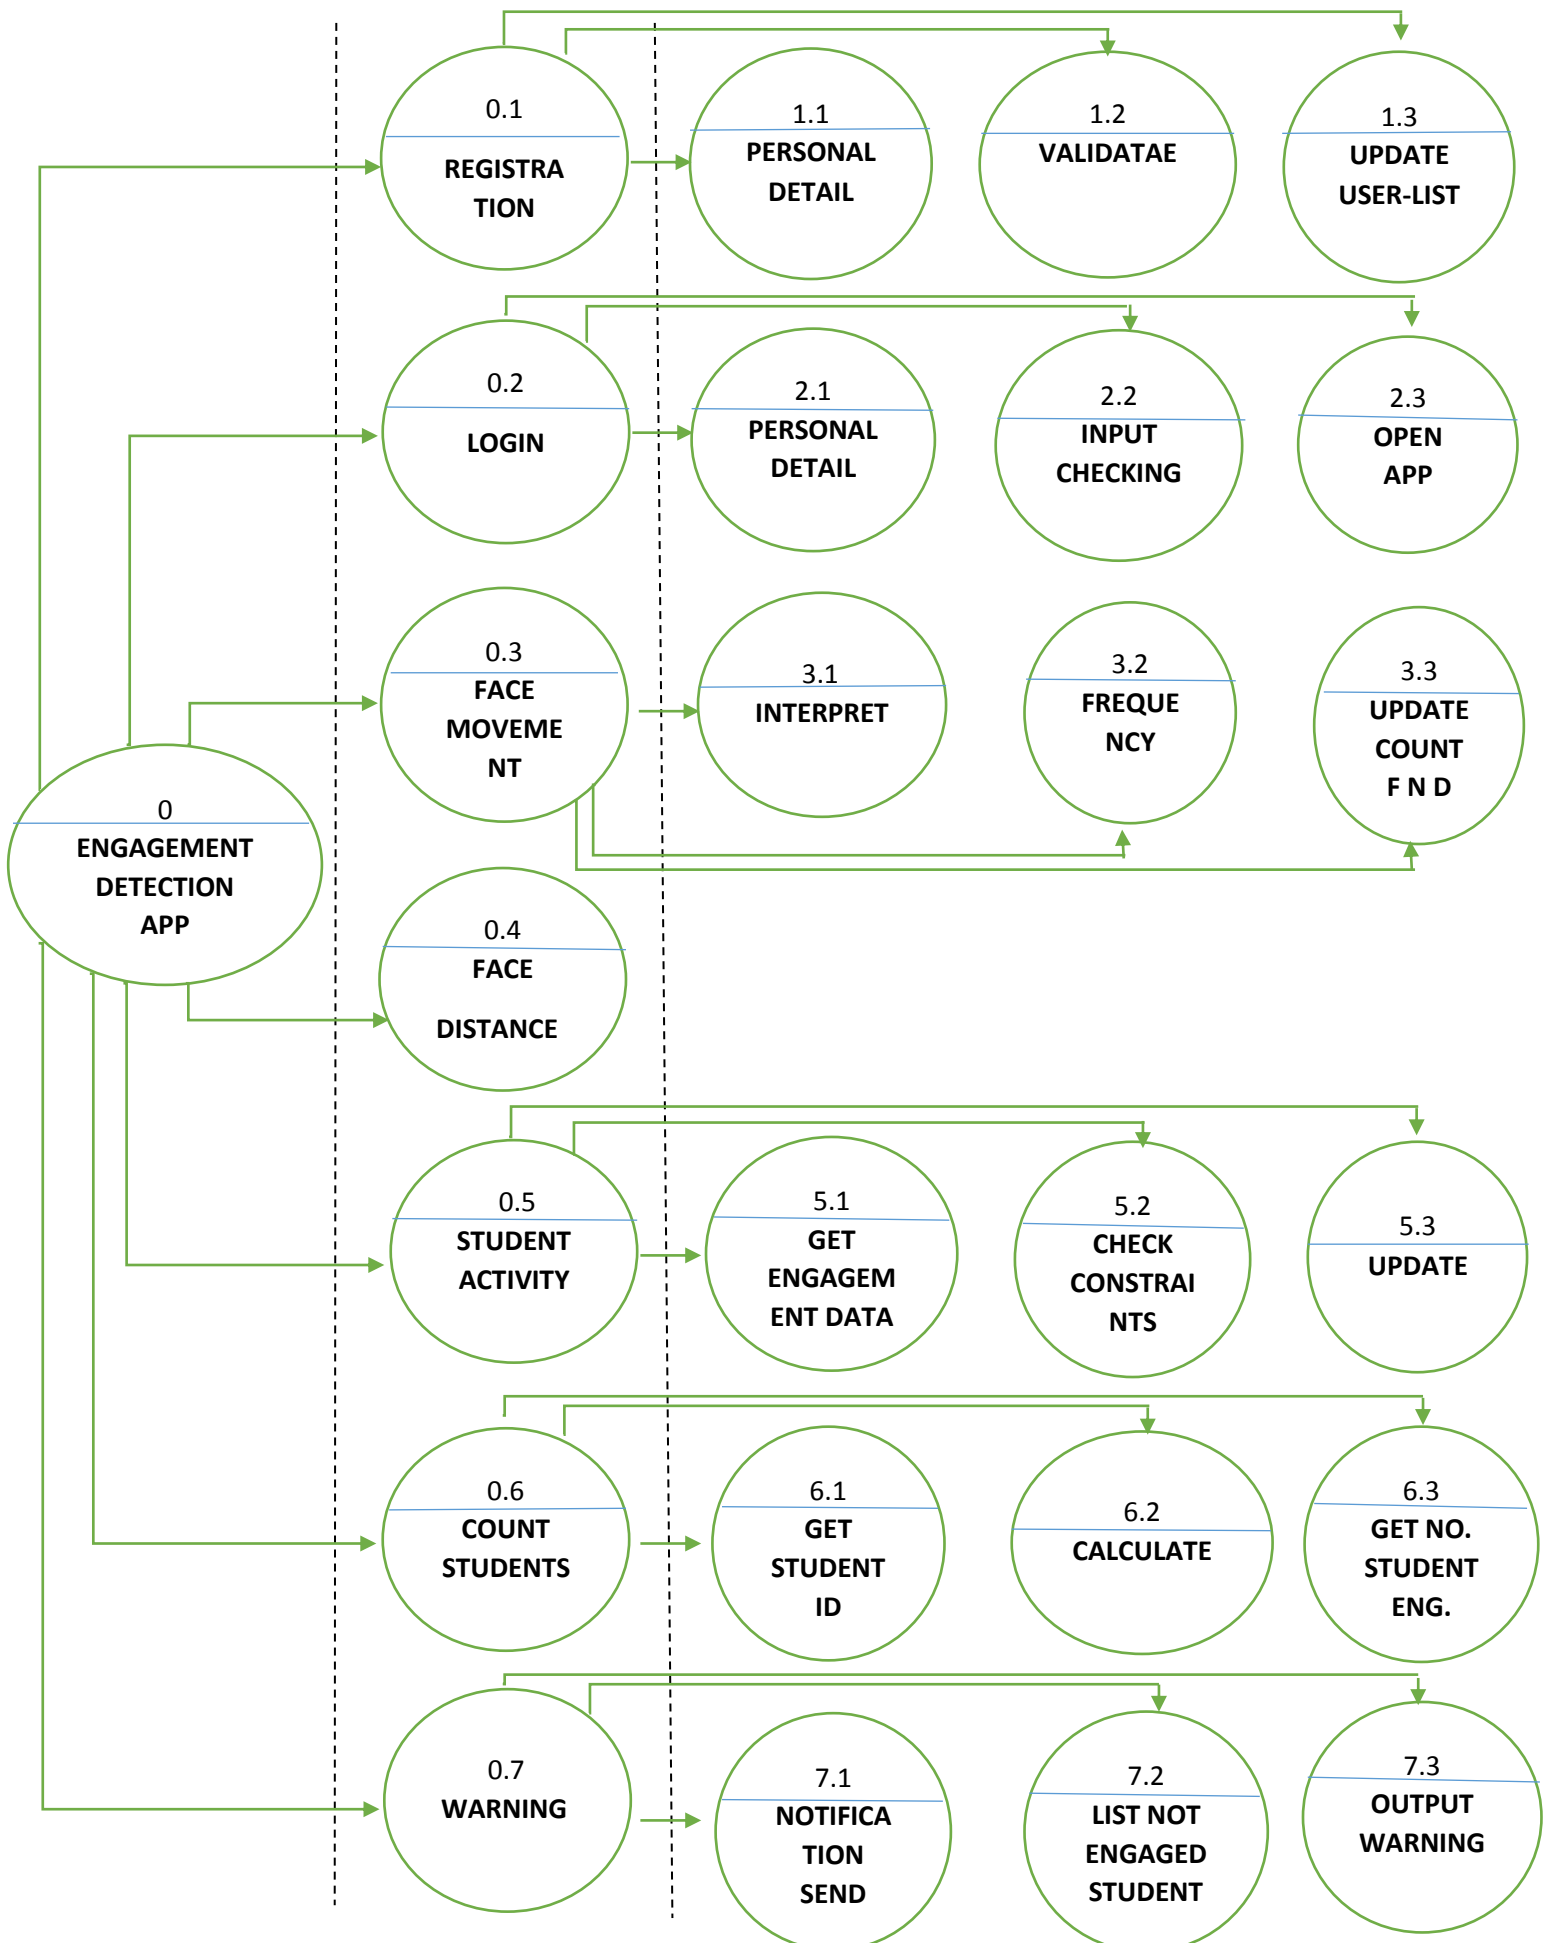

7) WARNING

ADDITION TO DATA DICTIONARY

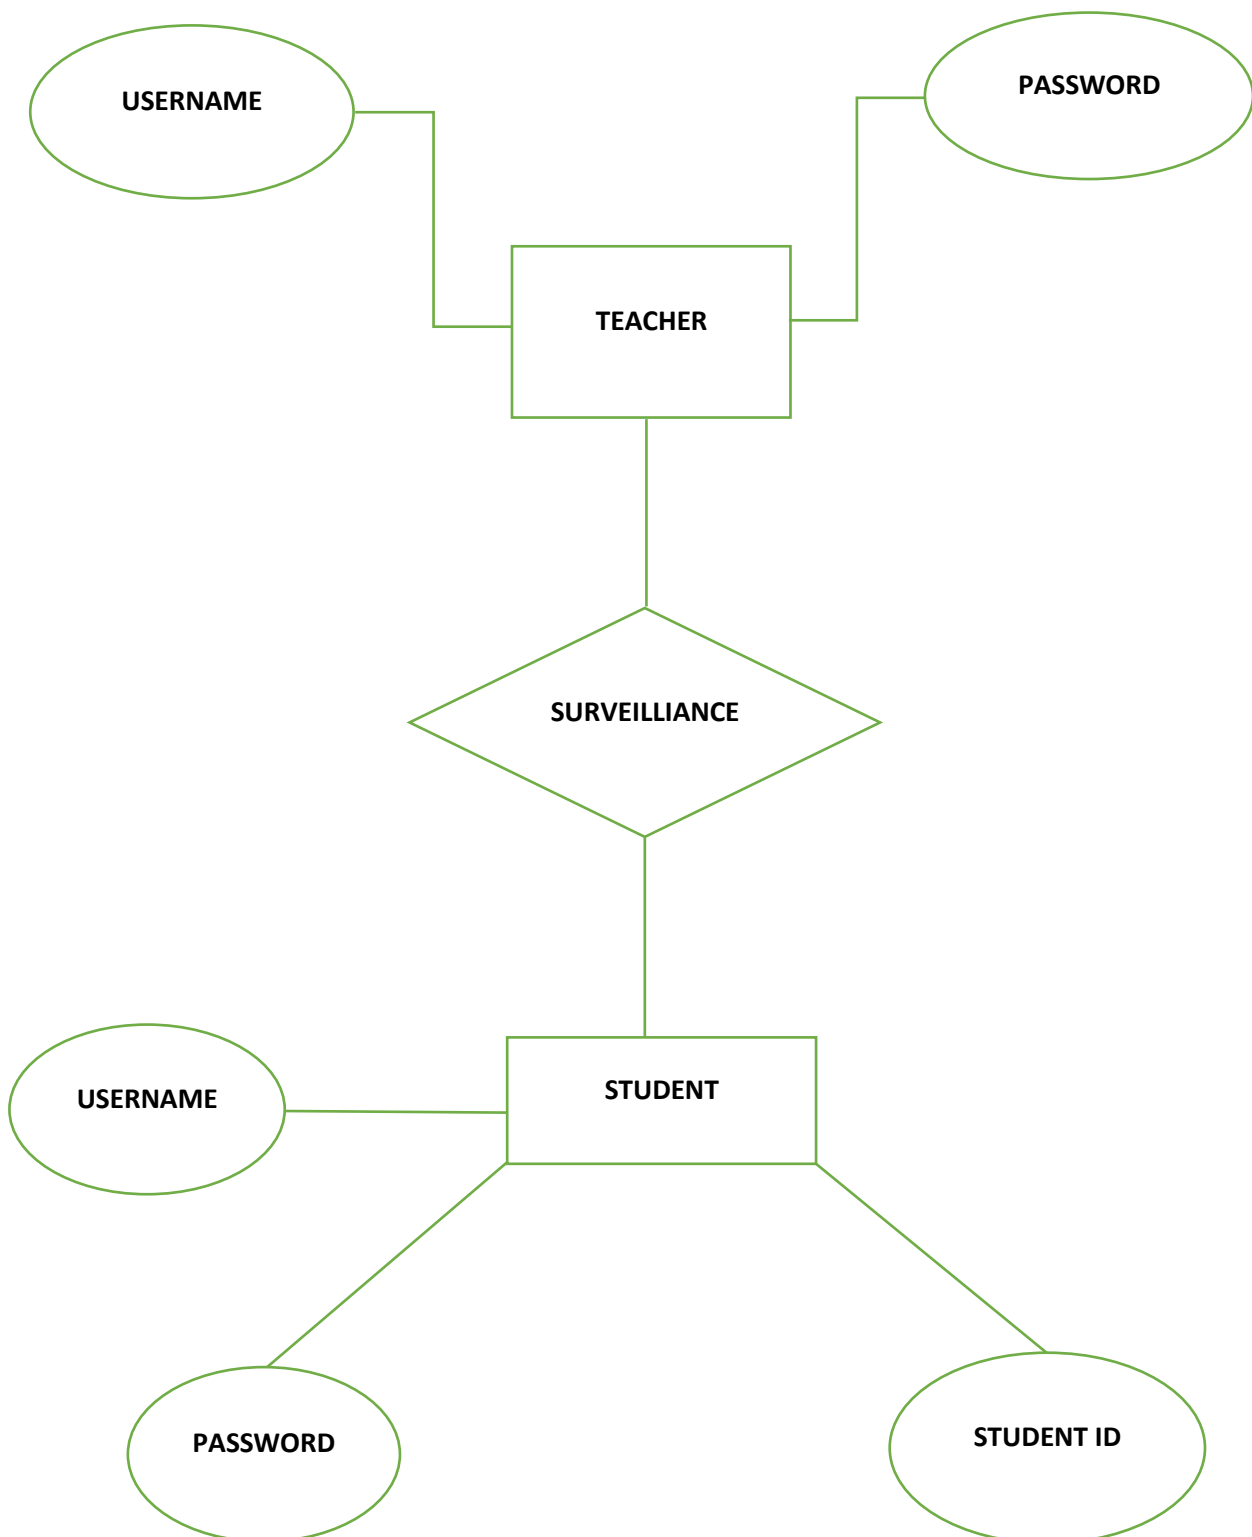

- **SEND** : [integer] Signal to send warning noti. to each student.
